Gear Check List	Back of Guide

Published March 2011

This Outdoor Gear Guide is packed full of information about outdoor gear, with a focus on clothing & footwear – written for a first-time outdoor adventurer.

Snowgum has been catering for the needs of outdoor enthusiasts for 80 years, since the first Scout Shop opened in Melbourne in 1926.

Over the years, Snowgum has melded all of that practical outdoor experience with fashionable styling to deliver a high performance range of lifestyle climate control clothing. Our heritage, however, remains in the outdoors and Snowgum has a focus on Scouts and Schools Outdoor Education programs.

Our people

Our team members are well trained and our product range is carefully selected with safety top of mind and comfort second. We also understand that the proposed investment may be for a short 5 day experience so it must be affordable. In every product category we offer a range of price options (not all of which are included in this guide as products change from time to time).

The most important thing is we guarantee our products will perform to the required standards – your life may depend on it!

Are you involved in a School, Scouts or other outdoor organisation?

Snowgum has a partner program which offers substantial discounts on the gear in this guide as well as an additional loyalty rebate for your School or Scout Group. So not only can we offer your students/members the best prices on outdoor gear, we will also provide financial support to your organisation. All you need to qualify is to have at least 50 families in your organisation, and that you are engaged in an active outdoor program. Enquire in-store, online or email the manager of our Outdoor Program – simon.mead@snowgum.com.au or phone (03) 9642 4340.

Price Guarantee

With the partner program above we guarantee that our prices are the most competitive on any item in this guide and across our range. Don't be fooled by our competitors advertised discounts. Snowgum regular prices already represent great value – often half those you'll see elsewhere.

Unconditional Quality Guarantee

Finally, something you don't see too often these days is an unconditional guarantee. If you're not completely satisfied with your purchase, we'll refund your money. It's that simple.

Ross Elliott
Managing Director

WHAT TO WEAR WHEN YOU'RE OUTDOORS...

Layering Techniques

The key to staying comfortable outside is to wear layers of clothing that can be varied according to your activity and the weather. Typically, there are three basic layers in a climate control clothing system:

1. The Wicking Layer "Next-to-skin"

The job of the next to skin layer is to wick moisture away from your body, minimising wet conductive heat loss. An effective wicking layer should be breathable and non-absorbent. Synthetic fibres such as polyester and polypropylene or natural fibres such as merino wool are good choices; fibres such as cotton are not, since they actually absorb and retain body moisture. They can become wet and uncomfortable very quickly and then stay that way since they dry very slowly. This is both uncomfortable and unsafe.

2. The Insulating Layer (Mid or warmth layer)

The insulating layer's prime function is to trap air and to keep your body warm whilst still allowing body moisture to pass through. Worn over the wicking layer, the insulating layer is often made up of synthetic fibres since they retain their insulating abilities even when wet. They also wick better, are lightweight and dry faster than natural fibres, such as wool and cotton and tend to be less bulky, allowing greater freedom of movement.

3. The Weather Protection Layer "Outer layer" or "shell"

This layer covers and protects all the other layers. It must be both waterproof and windproof to keep the other layers dry and aid heat retention. Like all the layers in a clothing system, outerwear must be breathable, to allow your body's moisture vapor to pass through to keep you comfortable.

All three layers are important ingredients in the climate control formula. However, the outer two layers are not always worn. Vary them according to the weather and your level of activity. These layering principles apply equally to your choice of footwear and socks.

SNOWGUM GUARANTEE

IF YOU ARE NOT COMPLETELY SATISFIED
SNOWGUM WILL REFUND YOUR MONEY

CLOTHING - LAYERING FOR OUTDOOR ACTIVITIES

Wicking Layer (Next-to-Skin)

Snowgum has several choices for the wicking layer. Here we explain three:

Snowgum Thermabods

Thermabods are a lightweight warm thermal layer made of polypropylene. Polypropylene is a warm and breathable material that is extremely fast drying and will keep most of its warmth even when wet. Thermabods are ideal for hiking, water activities and even for sleeping in. Thermabods come in both mens and womens fit, sizes XS-XXL and 6-18. Kids sizes S (2-4), M (6-8), L (10-12) are also available.

- Traps heat as a barrier against the cold.
- Wicks moisture away from skin.
- Lightweight and compact.
- Breathable and quick drying.
- Machine washable.
- Can be worn as a base layer or single layer.
- Recovers shape from constant use and stretching.
- Available in: Long Sleeve Top
Short Sleeve Top
Leggings

Snowgum Merino Wool

We use ultrafine 17.5 micron merino in our woollen thermals. This means that you will not feel that annoying itch often associated with wool. Merino has many natural properties that make it the best choice for outdoor use: It helps to regulate body temperature in both cool and warm climates; It washes and wears superbly; so there's less washing! It has natural fire retardant properties. One great advantage of Merino over polypropylene is that they don't stink after a few days wear.

- Naturally antimicrobial - wear all day and still feel fresh.
- Natural fibre making it more comfortable against the skin, even after excessive wear.
- Naturally fire resistant - will not melt or burn like synthetics.
- Mens sizes S-XXL, Womens sizes 8-18, Kids sizes 6-8, 8-10 & 12-14.
- Available in: Long Sleeve Top
Short Sleeve Top (adults only)
Leggings

Snowgum Akراسي, Anakie & Anvers Shirts

Ideal as a next to skin layer in hot weather or as an extra layer between the wicking layer and the insulating layer in cool weather. The rip-stop Tactel® fabric used in these shirts is rated at UPF 30+, providing excellent sun protection. The shirts are designed for maximum air flow to keep the wearer cool and have ample pockets for storage. Whilst the shirts are long sleeve, they have a tab and button to hold a rolled up sleeve in place when needed.

- Wicking breathable fabric.
- Super fast drying
- High venting to keep you cool.
- Storage pockets.
- Mens sizes S-XXL, Womens sizes 8-18, Kids sizes 6-14.

CLOTHING - LAYERING FOR OUTDOOR ACTIVITIES

Aramis/Ambra Shorts

These great shorts allow you to pack a whole lot of necessities in a wide array of pockets. The fabric is a 100% Supplex® Nylon so they are lightweight, quick drying and durable.

- Loose fit for greater comfort.
- Lightweight and compact for easy travel.
- Soft touch fabric for comfort whilst still fast drying.
- SCOTCHGUARD® Finish for enhanced fabric performance
- High IQ® endorsed UV resistance 50+
- Button and zip closure with belt loops
- Part Elasticated waist for comfort
- Twin mesh pockets at waist for quick dry
- Twin Cargo Pockets at thighs
- Zippered rear pockets for security.
- Mens sizes 30 - 40
- Ladies 8 - 18

Zip Off Pants - Bago/Banca/Roje

These two in one pants can be converted to a pair of shorts and offer excellent UV protection when total leg protection is required. They feature loads of practical pockets and have a zippered gusset at the bottom of the leg to make it easy to remove them over your boots. They are lightweight, rugged and dry quickly when wet.

- Fast drying.
- Comfortable elastic waist band.
- Convert to shorts in hot weather.
- Secure storage pockets.
- Mens sizes 30-40
- Womens sizes 8-18
- Kids(Unisex) 6-14.

Ranger and Yogi Hats

Hats are a must in today's high UV environment and the Ranger and Yogi boast 30+ UV protection. They both have a handy chin strap for windy days and an absorbent "dry touch" head band inside to aid in wicking perspiration. The Yogi has an added highly breathable nylon mesh band around the crown to keep you cool

- Stiff broad brim.
- Superfast drying.
- Wicking headband.
- UF 30+ protection.

Ranger

Yogi

Snowgum Teplo Fleece Accessories

Snowgum Fleece accessories are a warm and comfy accompaniment to any of our Winter Jackets.

- Soft and warm
- Machine washable
- Anti-pill fleece
- Mens, Womens, Kids
- Some items available with thinsulate.

CLOTHING - LAYERING FOR OUTDOOR ACTIVITIES

Warm Wear - the Insulating Layer

Snowgum Voyager & Venture Jackets

Snowgum Teplo® anti-pill fleece jackets are an ideal insulating layer. Mid weight fleece with a full zipper front opening in both mens and womens fit. All trimmings and accessories have been carefully chosen not to compromise the performance of this garment.

- Internal draft flap for added protection.
- Zippered handwarmer pockets for warmth.
- Draw Cord at bottom for fit adjustment.
- Lightweight and quick drying.
- Mens sizes XS-XXL, Womens sizes 8-18.
- Available in other colours.

Snowgum Refuge & Goa

The pinnacle of fleece jackets.

The Snowgum Polartec®

Windpro series offers maximum warmth without weight. This fabric is manufactured by Polartec® in the USA using state-of-the-art technology to deliver a garment that will maintain its appearance for years of wear

- Internal draft flap for added protection.
- Draw Cord at bottom for fit adjustment.
- Lightweight and quick drying.
- Mens sizes S-XXL, Womens sizes 8-18.
- Available in other colours.

Overland Fleece Pants

Great for cold weather outdoor activities.

- Teplo® Doublesided anti-pill fleece
- Ultra lightweight
- Super fast drying.
- Machine washable
- Mens sizes XS-XXL, Womens sizes 6-18. Kids sizes 2-12

Snowgum Micro-Fleece - Bowen & Bella

The superfine cut-pile Snowgum micro fleece allows maximum moisture vapour transfer and provides an ideal lightweight warmth layer.

- Ultra lightweight
- Super fast drying.
- Mens sizes S-XXL, Womens sizes 8-18.
- Available in other colours.

CLOTHING - LAYERING FOR OUTDOOR ACTIVITIES

Outerwear - The Weather Protection Layer

Snowgum Storm Jacket and Overpants

The "Storm" range of jackets and over pants are constructed from VaporTEC® 3-layer fabric. The fabric is actually made up of three separate layers laminated together to form one piece of ultralight, thin and extremely durable fabric. The three layers consist of an outer nylon shell which is durable and tear resistant, a middle highly waterproof and breathable membrane and an inner layer made from a mesh material that protects the membrane and helps the jacket to breathe. This all sounds technical - and it is. The fabric is engineered to stop the wind and rain from coming in whilst allowing moisture vapour from perspiration to escape. This means that the wearer is able to stay dry and comfortable as body moisture vapour will pass through the membrane. These garments work best when accompanied by the correct 1st and 2nd layers.

- 100% Waterproof and Windproof.
- Highly breathable means increased comfort.
- Abrasion Resistant - for heavy use and longer life of the fabric.
- Centre front double ended zip for fit and comfort adjustment.
- Centre front draft flap with velcro closure over zip for a completely waterproof seal.
- Peaked Hood with velcro and drawcord adjustment for fit and comfort.
- Mens sizes XXS-XXL, Womens sizes 6-18.

Snowgum Nerotec™ Jackets and Overpants

Snowgum NeroTEC™ coated garments are 100% Waterproof and Breathable. Whilst they do not have the durability of the Storm jacket, they will keep you well protected in all but extreme weather conditions.

- 100% Waterproof and seam sealed PU coated nylon fabric.
- Breathable for added comfort.
- Elasticated waist with toggle adjustment
- Zip and stud closure for over footwear
- Pack-away mesh sac included
- Velcro cuff at sleeves for fit adjustment.
- Drawcord at waist for fit adjustment.
- Rollaway hood with velcro fit adjustment.
- Mens sizes S-XXL
Womens sizes 8-18
Kids sizes 6-14

SNOWGUM GUARANTEE
IF YOU ARE NOT COMPLETELY SATISFIED
SNOWGUM WILL REFUND YOUR MONEY

Snowgum Nerotec™ Lite Jackets and Overpants

- 100% Water and Windproof
- Breathable Coating Inside
- 100% Seamsealed
- Packaway Hood on jacket
- Zippered Pockets
- Packs into Stuffsack
- Lightweight & Packable
- Mens sizes XS-XXL
Womens sizes 6-18
Kids sizes 2-12

FOOTWEAR

Sturdy, supportive boots will be one of your most important outdoor gear investments. Major considerations must be ankle support, quality of components and construction, comfort and waterproofness.

- *When trying them on, wear the socks you intend wearing with the boots, a light pair of wicking socks next to your skin and heavy pair of wool blend socks on the outside is recommended.*
- *With the boots laced firmly, go through the following procedure and let the answers be your guide:*
 - *Are your big toes 1cm from the end of the boot?*
 - *Can you move your toes freely? Boots that are tight around the toes are cutting off circulation and may cause cold feet in winter and/or blisters in summer. You may need a wider boot.*
 - *Does the back of the boot hold your heel in place when you walk around? If not, rubbing up and down will cause blisters. Perhaps try a smaller pair or a different style.*
 - *Firmly kick the toe of the boot into the floor. If your foot slides in the boot, and your toe touches the end, the boot is either too long or has too much volume.*
 - *Lean forward on to your toes. Is the boot flexible and lightweight enough to allow for comfortable walking?*

Snowgum Cooper VaporTEC® Boots

Sturdy construction with 100% waterproof breathable VaporTec® lining
- keeps your feet dry while reducing build up of sweat and condensation.

- Coolmax® wicking layer.
- 100% Waterproof and breathable membrane lining.
- Lightweight.
- Cushioned dual density sole unit for added comfort.
- Traction and slip resistant outsole for increased stability.
- Medium height ankle collar.
- Breathable leather and nylon upper for maximum abrasion resistance.
- Metal fittings and durable nylon laces.
- Unisex sizes 38 - 46

Snowgum Flinders VaporTEC® Boots

These models also include the 100% waterproof and breathable VaporTEC® membrane. They have a higher cut ankle collar for better ankle support and a wicking Coolmax® lining to ensure your feet stay drier longer.

- Coolmax® wicking layer.
- Higher cut ankle collar for added support.
- Reinforced toe box for added protection.
- 100% Waterproof and breathable membrane lining.
- Lightweight.
- Cushioned dual density sole unit for added comfort.
- Traction and slip resistant outsole for increased stability.
- Medium height ankle collar.
- Breathable leather and nylon upper for maximum abrasion resistance.
- Brass fittings and durable nylon laces.
- Mens sizes 37 - 47

Snowgum Wallace VaporTEC® Boots

Like the 2 models above this uses a VaporTEC® membrane and offers all similar features but in smaller sizes

- 100% Waterproof and breathable membrane lining.
- Lightweight.
- Durable Rubber outsole.
- Traction and slip resistant outsole for increased stability.
- Medium height ankle collar.
- Breathable leather and nylon upper for maximum abrasion resistance.
- Metal fittings and durable nylon laces.
- Kids sizes 33 - 40

FOOTWEAR

Snowgum Aqua Shoe

These slip on Aqua shoes are a must for any aquatic sports. The neoprene keeps your feet warm in cool water and have a draw cord fastener to keep them snug on your feet. The high grip sole is ideal for use on wet rocks.

- Bag included for easy storage.
- Unisex sizing XS - XL.

Gaiters

Reliable protection for shoes and trouser legs. These gaiters protect from wet, dirty grounds, snow and undergrowth. They are our most popular gaiter.

- Made from 420 HD Nylon
- Zip up front with draw string top
- Available in S, M & L

SOCKS

The best socks for extended outdoor activities are a wool blend. Sound construction and a good snug fit are important to avoid blisters. Wearing two pairs of socks also helps prevent blisters as the friction occurs between the two socks and not against your foot. A thin liner sock against the skin and a thicker sock over it works best. Avoid 100% nylon or cotton socks. Nylon on its own does not wick moisture and cotton absorbs sweat and stays wet.

Snowgum Ultra Liner Socks

The perfect liner sock for outdoor activities.

- Wicking
- Insulates
- Reduces blisters
- Available in Mens and Womens sizes

Snowgum Outdoor Warm Wool Socks

The Outdoor Warm wool range of Snowgum Socks are 80% natural wool and have been constructed with a thick loop-pile throughout the sock, for maximum support on long walks.

- Warmth
- Wool fibre insulates when cool and breathes out excess heat vapour when active
- Elasticated at cuff and arch areas
- Smooth heel and toe seams
- Dense under foot padding
- Womens and mens sizes
- Wide range of colours
- Available in Mens and Womens sizes

Snowgum Travel Warm Socks

The Travel Warm range of Snowgum Socks are ideal for use in the outdoors. Comfortable, padded and warm, these socks have been engineered using wool, polypropylene and elastane, for a high level of performance

- Wicking
- Fast Drying
- Durability
- Comfort
- Available in Mens, Womens and Kids sizes

SNOWGUM GUARANTEE

IF YOU ARE NOT COMPLETELY SATISFIED
SNOWGUM WILL REFUND YOUR MONEY

OUTDOOR ACCESSORIES

Safety Whistle

Lightweight, rust proof, unbreakable emergency whistle.

5 metre length of Strong Nylon Cord

Handy for emergencies - a broken shoe lace or a tent guy rope. Doubles as a clothes line.

Windproof Storm Matches

Windproof matches that will ignite in any weather, with an extra long head that burns for approximately 10 seconds. Sealed in a waterproof container, which has a striking surface on the top and bottom.

Emergency Blanket

A compact, lightweight blanket made from aluminised, non-stretch polyester. Stays flexible in freezing temperatures. Reflects body heat back to body. Wind and waterproof.

Snowgum Trowel

A lightweight, convenient trenching tool made of high impact plastic.

Eagle Creek Bottle Set

You'll want to keep liquids safe and secure so this set is ideal for things like shampoo, mouthwash and tablets. The bottles can be easily marked so there is no confusion as well.

- Leak-proof bottle.
- Re-useable storage bag.
- Identification labels.
- 2 x 4oz bottles, 2 x 2oz vials, 2 x pill boxes

Eagle Creek Pack-It® Sacs

These handy storage sacs are a clever way of keeping your gear organised. Great for separating dirty shoes, wet towels and clean clothes. They come in a range of sizes and colours for easy identification.

Eagle Creek Pack-It Quick Trip

Just enough room to fit in your essential toiletries!

- Zippered pockets for small items.
- Stain and water repellent Silver Lining™
- Carry handle.

Snowgum Y Pegs

Lightweight and super strong. These alloy Y pegs will suit any hike tent.

Snowgum Travel Towel

These are perfect for hiking or travel. They are highly absorbent yet dry very quickly which makes them much more practical than cotton when you are on the move. They are also light and pack away to a very small size.

- Quick drying.
- Light weight.
- Ultra absorbent.
- Bacteria resistant.

Wilderness Wash

An all purpose biodegradable detergent suitable for body soap, shampoo and dishwashing.

- Available in 40ml & 100ml bottles

OUTDOOR ACCESSORIES

Snowgum Torches all use LED globes for the best illumination and minimal power use. LED bulbs last for thousands of hours so you will not need to carry replacements. They also use less power than conventional globes, so most models will burn for more than 10 hours from one set of batteries.

Swivel LED Headtorch

Perfect for night walking or for when you need to keep your hands free - while cooking and reading. The light has three stages of brightness depending on your needs and can also be pivoted to obtain the best angle.

- Adjustable elasticated headstrap for comfortable fit.
- 9 Bright LED's
- Varying light levels with easy one touch operation.
- Lightweight & durable
- Aluminium casing
- Side Swivel adjustment
- May be removed from head band and used separately
- Includes 3 x AAA batteries

Dynamo LED Headtorch/Biketorch (No Batteries Required)

Perfect for night walking or for when you need to keep your hands free - while cooking and reading. The light has three stages of brightness depending on your needs and can also be pivoted to obtain the best angle.

- Adjustable elasticated headstrap for comfortable fit.
- 3 Super bright LED globes.
- Varying light levels with easy one touch operation.
- Crank the rear handle to charge - more than 30 minutes illumination time after one minute of cranking!
- Includes bike attachment fitting
- Batteries not required.

Snowgum Multi Function 4 LED headtorch

A great general purpose, lightweight and packable LED headtorch. Great for the campsite, travelling or at home.

- 4 x Ultra Bright Long Life LED's
- 3 x Bright Red LED's
- 3 x light modes - 2, 4, 3 red flashing
- Adjustable beam direction
- Press button operation
- Long life LED's offer 10 000+ hours of use
- Includes 3 x AAA 1.5V batteries
- Adjustable elastic headband

1 litre BPA Free Bottle

Our bottles are made from Tritan Plastic which is BPA Free and is unrivalled for it's blend of strength and light weight. The material is almost unbreakable and is also odourless. The 1 litre capacity makes it ideal for most day walks.

- Odourless - won't retain smell of previous liquid for a fresher taste every time.
- Dishwasher Safe.
- Crack resistant for longevity of the product.
- Wide mouth for easy refilling.
- Tritan lid with water tight silicon seal.

Snowgum Cutlery Set

Your own personal cutlery set in it's own pouch.

- Contains one folding knife, fork and spoon with can and bottle opener.
- Easy to carry pouch with velcro fastener.
- Compact for easy storage.

Snowgum Melamine Set

This set contains a plate, deep plate, bowl and a mug all together in a handy mesh storage bag. Melamine is well known for being tough, lightweight and easy care.

Snowgum Coolband

The Snowgum Coolband is water activated and contains a unique composite material, which cools when wet. Unlike other cooling bands, the Snowgum Coolband does not use beads, crystals or gels.

Use dry as a regular sweatband to absorb perspiration, or place in water for 3 to 5 minutes for a cooling head or neck band. The Snowgum Coolband can also be refrigerated for longer cooling!

SLEEPING BAGS

There are three important factors to consider when choosing your sleeping bag: The shape, the shell (outer material) and the filling material.

Shape. Snowgum has developed a tapered rectangular shape for outdoor use providing the best balance between warmth, comfort, weight and bulk. Wider in the hips and shoulders, narrower in the foot (but still with plenty of room to move) and a double ended full zipper allowing the bag to be opened out flat and used as a quilt or unzipped at the foot only for added ventilation.

Shell. Snowgum uses only superfine high thread count nylon ripstop outer shells for added durability, water repellency and breathability. The inner is 100% high wicking superfine polyester which is soft against the skin and extremely breathable. It is also non absorbent so if you do sweat in the bag it will dry quickly. Cotton or flannelette lined sleeping bags should be avoided for outdoor use.

For added comfort and to keep your bag clean we recommend the use of an inner sheet at all times.

Filling. There are basically two types of sleeping bag filling: synthetic and down/feather.

Synthetic Filling

Snowgum uses synthetic fillings that have been created to emulate the air trapping characteristics of down. Our synthetic fillings are made from a hollow fibre about the size of a strand of hair and have either one or many hollow channels in them. These are too small for the naked eye to see but they are very effective at trapping warm air and thus keeping your body warm. The fibres loft well (fluff up when removed from the storage sack) and are sewn in panels that are placed strategically around the bag for best performance (eg, some have more on the top than the bottom). Synthetic bags are not as warm as down bags for the same weight of filling but they do maintain their warmth when wet and dry quickly - this is a significant advantage over down.

Snowgum has many choices of sleeping bags. Only the more popular outdoor models are shown here.

Snowgum Leichardt

FILLING: Synthetic Hollow Fibre
UPPER: 2 layers of 150g/M2
BOTTOM: 2 layers of 150g/M2
FABRIC: RipStop Nylon
WEIGHT: 1.6Kg
SIZE: 183 (+32)x77x58cm
STUFF SACK: 22x40cm

Rating: -5°C

- Mesh security pocket on pillow.
- Compression stuff sack.
- Internal draft stopper.
- Offset stitched construction

Snowgum Sturt

FILLING: Synthetic Hollow Fibre
UPPER: 2 layers of 150g/M2
BOTTOM: 1 layer of 200g/M2
FABRIC: RipStop Nylon
WEIGHT: 1.4Kg
SIZE: 183 (+32)x77x58cm
STUFF SACK: 20x40cm

Rating: -2°C

- Mesh security pocket on pillow.
- Compression stuff sack.
- Internal draft stopper.
- Offset stitched construction

SNOWGUM GUARANTEE

IF YOU ARE NOT COMPLETELY SATISFIED
SNOWGUM WILL REFUND YOUR MONEY

SLEEPING BAGS AND ACCESSORIES

Down/Feather Filling

Down/feather comes from ducks or geese. Down is the very light natural fibre that lies close to the birds body and provides insulation. Down sleeping bag filling also contains a small amount of "small feathers" which assist in keeping the down loose and assists loft (the amount the bag fluffs up when taken out of the stuff sack). The down is distributed around the bag in a series of channels or baffles that ensure you have the right amount of filling for each part of your body - eg more on top than the bottom and more around the chest than the legs. Whilst down is unrivalled for warmth to weight ratio and is resilient to compression it is not very effective when wet and will take some time to dry. It is also considerably more expensive than most synthetics.

Snowgum Couloir

FILLING: 90/10 White Goose Down
600 loft.
TOTAL FILL: 550g
FABRIC: 40D 320T Nylon
WEIGHT: 1.3 Kg
SIZE: 183 (+32)x77x34cm
STUFF SACK: 18x37cm

Rating: -2°C

- Mesh Security Pocket on Pillow.
- Compression stuff sack.
- Internal Draft Stopper.
- 3D box wall construction

Snowgum Spindrift

FILLING: 90/10 White Goose Down
600 loft.
TOTAL FILL: 700g
FABRIC: 40D 320T Nylon
WEIGHT: 1.5 KG
SIZE: 183 (+32)x77x42cm
STUFF SACK: 18x37cm

Rating: -5°C

- Mesh Security Pocket on Pillow.
- Compression stuff sack.
- Internal Draft Stopper.
- 3D box wall construction

Snowgum self-inflating sleeping mats offer a more comfortable and higher insulating sleeping option than the thin closed cell foam mats generally issued for outdoor activities.

The high tech construction combines air trapping open-cell foam bonded to a waterproof, durable outer shell. The open cell foam naturally expands when you open the valve, draws in air and "self inflates" the mat. Close the valve when inflated and the trapped bubbles of air form an exceptional insulating layer to prevent heat loss through the ground. The bonded construction helps provide maximum comfort preventing the complete displacement of air and foam at your hips and shoulders, meaning they will be supported off the ground and you will have a better nights sleep.

Snowgum Siestamat & Moonlite Mats

Lightweight, durable and easily stored, this mat will ensure you have a comfortable nights sleep.

- Screw valve opening for self inflation. No pump required.
- Storage sac for easy mobility and packing.
- Three sizes available.
 - Siestamat: 1800 x 600 x 40 (1300g incl.sack)
 - Moonlite Long: 1800 x 600 x 30 (900g incl.sack)
 - Moonlite 3/4: 1200 x 600 x 30 (685g incl.sack)

Inner Sheets

An inner sheet will improve your sleeping comfort and prolong the life of your sleeping bag.

- Polycotton for faster drying.
- Lightweight
- Machine washable.
- Double folded seams.
- Increase the warmth of your bag.
- Keeps your sleeping bag clean

TENTS

Snowgum offers a range of 4 lightweight tents to suit a variety of uses and climates. Only the best quality materials are used, from UV resistant polyurethane coated ripstop polyester flies to high grade aluminium alloy poles.

- *When purchasing a tent be sure to ask for the Season rating so that you purchase the tent that is right for you. 4 Season is suitable for snow use, 3-4 is suitable for all conditions other than heavy snowfall.*
- *So that you are familiar with your equipment, always read the Care Instructions and practice assembling your tent prior to taking it out on its first outdoor experience.*

1. Snowgum Storm Shelter

An excellent 4-season dome tent. Simple to erect two person tent made from tough ripstop polyester. The Storm Shelter is good for Alpine and High Altitude Camping.

Features:

- Twin entrances for easy access
- Twin Vestibules for gear storage and added shelter
- Seam sealed deep tub floor and fly for maximum water repellency
- Tri-pole intersection for greater rigidity and strength in harsh conditions

Specifications:

Seasons: 4
Weight (kg): 3.2 kg including 6 pegs
Inner Weight: 1160g **Fly Weight:** 1075g **Pole Weight:** 636g
Peg/Guy Weight: 11g each
Fly: 75D ripstop polyester 3000mm Waterhead PU Coated
Floor: 70D nylon 5000mm Waterhead PU Coated
* Fully seam sealed floor and fly
Openings: Twin entrances for easy access
Poles: 8mm Aluminium Alloy
Pegs: Alloy Skewer

3. Snowgum Flash

An excellent 3-season tent. Simple to erect two person tent made from tough U.V. resistant ripstop polyester. The Flash is suitable for lightweight hiking and camping.

Features:

- Twin entrances for easy access featuring YKK double zippered doors for ventilation
- Twin Vestibules for storing backpack and gear
- Seam sealed deep tub floor and fly for maximum water repellency.

Specifications:

Seasons:	3				
Weight (kg):	2.5kg including 4 pegs				
Inner Weight:	1040g	Fly Weight:	1000g	Pole Weight :	415g
Peg Weight:	11g each				
Fly:	75D ripstop polyester 3000mm Waterhead PU Coated				
Floor:	70D nylon 5000mm Waterhead PU Coated				
* Fully seam sealed floor and fly					
Openings:	Twin entrances for easy access				
Poles:	8mm Aluminium Alloy				
Pegs:	Alloy Skewer				
Guys:	4 Multiple guy out points for stability				

4. Snowgum Swift (institution/industrial construction)

Our most durable and hard wearing tent. The simple, single-pole integral pitch design is easy to erect and has space for 2 persons with gear. The Swift is made with heavy-duty zips, strong construction and easy maintenance details for schools, hire use and outdoor education centres.

Features:

- Single entrance with mesh #10 YKK double zippered doors for ventilation
- Integral pitch design. Fly is permanently attached to inner, meaning components will not get lost. This also makes the tent extremely fast to pitch (less than 2 minutes).
- Seam sealed deep tub floor and fly with our highest level of waterproofing for extreme protection.

Specifications:

Seasons:	3-4 seasons tent				
Weight (kg):	3.3kg including 4 pegs				
Inner Weight:	1600g	Fly Weight:	980g	Pole Weight :	300g
Peg/Guy Weight:	43g each (Steel)				
Fly:	75D ripstop polyester 5000mm Waterhead PU Coated
